

PTI v5.0 — EXTERNAL REVIEW CERTIFICATION

Longview Meridian Holdings, LLC · PagoYa Technologies · Predictive Trust Index · Signoff-gate record artifact for version v5.0.0-rc1-fair-lending-recomposition

1. Artifact under review

PTI v5.0 (Row 5b package + G-C readiness gate): dimension recomposition PR 36 / BC 22 / ED 22 / CF 20; removal of all SES-direct scoring inputs; marginal-above-floor restructures for payment_streak and verified biller_diversity; volatility-tolerant streak gate criterion. Founder signatures on the package and gate text recorded 2026-07-09. Basis: task brief v1.9; frontier record Rows 1–5b; code commit 1b2d787 plus the v5.0 patch validated to 1.4e-14 against the graded package.

2. Fixed scope of this review

The reviewer validates finished work and signs; the reviewer does not produce. Scope: (a) methodology of the disparate-impact diagnosis and less-discriminatory-alternative search; (b) adequacy of the LDA search record; (c) defensibility of the business-necessity memo, including the residual-disparity attribution (findings F-1a and F-2) and the plainly stated volume trade (–9.7% handoff volume for a ~9× gate-level four-fifths improvement at +0.0007 selection quality); (d) adequacy of synthetic-data caveats and the MFI-backtest re-validation commitments.

3. Materials reviewed (the packet)

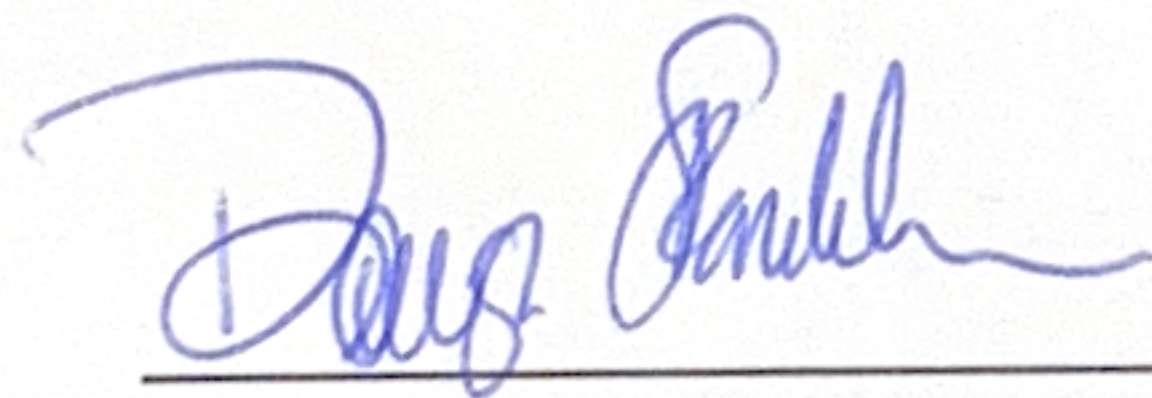

• Task brief v1.9 with full amendment audit trail • Phase 0.5 recalibration memo • Phase 1 findings (v1.1, K1-corrected) • Phase 2 frontier record with all run logs, scripts, seeds, and checksums (the LDA search record) • Phase 3 implementation spec (draft, watermarked) • Phase 4 documentation pack: business-necessity memo, model card delta • Incident entry FL-2026-07-09-01 and signature record 2026-07-09

4. Certification

I have reviewed the materials above within the fixed scope. In my professional judgment, the fair-lending testing methodology is sound; the less-discriminatory-alternative search is adequately documented and its exhaustion defensibly declared; the retained predictors with residual disparity are supported by the business-necessity analysis; the stated limitations, conditional results, and monitoring commitments are appropriately disclosed. My written opinion, including any noted reservations, is attached as Exhibit A and is incorporated into this certification.

Filing upon signature: this page is the official external-review signature. It is filed as the external-review artifact referenced by the v5.0.0-rc1 entry in the PTI licensee version registry (signoff-gate enforcement); its file hash is recorded in that entry alongside the founder signature record of 2026-07-09. Upon filing: (1) the DRAFT watermarks on the Phase 3 implementation spec and Phase 4 documentation pack lift; (2) the Phase 3 PR merge-blocking checklist item "External review signature" is checked; (3) rollout proceeds per Phase 3 §3.4 (paula_messages schema/seed and the approved Meta transition template precede any recompute). Exhibit A (reviewer's written opinion) travels with this page permanently.
