

PRE-SEED PRESENTATION · JUNE 2026

Financial identity for Mexico's 65 million unbanked.

Paula pays your bills, builds your Trust Score, and unlocks credit access — no bank account, in two minutes, via WhatsApp.

\$25 MXN flat fee · No app download · Profitable from transaction 1

pagoyamx.com • lloyd@pagoyamx.com • Founder Institute Austin · Summer 2026

THE PROBLEM

65 million unbanked adults pay their bills at convenience stores.

\$14–20 MXN per service, per trip, every month — waiting in line, cash only, no digital record.

| **\$60–80 MXN/mo**

in fees for a typical household (CFE + Telmex + 2 top-ups)

| **\$400–600 MXN**

CFE reconnection fee if the payment is late

| **20–35 minutes**

per store visit including travel and wait time

| **No digital record**

no payment history, no credit footprint, no receipts — financially invisible

MEET PAULA  AI AGENT

Not a chatbot. An agent that acts.

Understands natural language

No menus, no forms, no app. Say "Pay my CFE" or "Get me Netflix" — Paula handles the rest

Reasons and acts autonomously

Looks up the bill, checks your balance, confirms the amount, executes the payment — one message

Persistent memory across conversations

Remembers every bill, due date, and payment. Builds financial identity for people without a bank account

Proactive — alerts before cutoffs

Paula messages you 3 days before your due date. You don't have to remember it. She does.

Paula · PagoYa
online

✦ Paula proactively alerts you

⚠ Heads up — your CFE bill (\$380 MXN) is due in 3 days.

Shall I pay it now from your balance? You have \$520 MXN available.

Yes, pay it

✦ Paula reasons, verifies and executes

Checking balance... ✓

Verifying CFE account... ✓

Processing via SIPREL... ✓

✓ Done. CFE paid.

📄 Receipt #CFE-2026-0604-8821 · \$380 MXN + \$25 fee

PAY ANYTHING

⚡ UTILITY BILLS

· CFE (electricity) · Telmex · Izzi · TotalPlay · Gas Natural · Telcel
· Sky · Megacable · Dish · AT&T

🎁 GIFT CARDS & SUBSCRIPTIONS

· Netflix · Amazon · Google Play · Spotify · Xbox · Nintendo
· iTunes

👤 P2P TRANSFERS · COMING SOON

Split expenses, send balance, pay
each other via WhatsApp

📈 CREDIT HISTORY · COMING SOON

Payment history unlocks BNPL,
micro-loans, and insurance

THE DATA BARRIER

Every payment builds their financial identity.

7 dimensions of real behavior — the credit file no bureau has ever built for this population.

-  **Payment streak**
Consecutive on-time payments — the strongest predictor of reliability
-  **Service diversity**
CFE + Telmex + Netflix: multiple services = greater financial stability
-  **Wallet balance**
Average balance level — savings pattern visible from day one
-  **Load-to-spend ratio**
How much is loaded vs. spent per cycle — cash-flow discipline
-  **KYC verification**
Identity confirmed via INE/passport — ecosystem trust signal
-  **Missions completed**
Platform engagement — long-term retention indicator
-  **Account age**
Time active with PagoYa — accumulated history, no bank required

WHAT THE TRUST SCORE UNLOCKS

- 600+

Emergency micro-credit
\$500–2,000 MXN · BNPL for utilities

✓
- 680+

Basic unemployment insurance
Covers 1 bill if the user loses income

✓
- 720+

Personal loan
\$5,000–20,000 MXN · preferred rate

→ SOON
- 760+

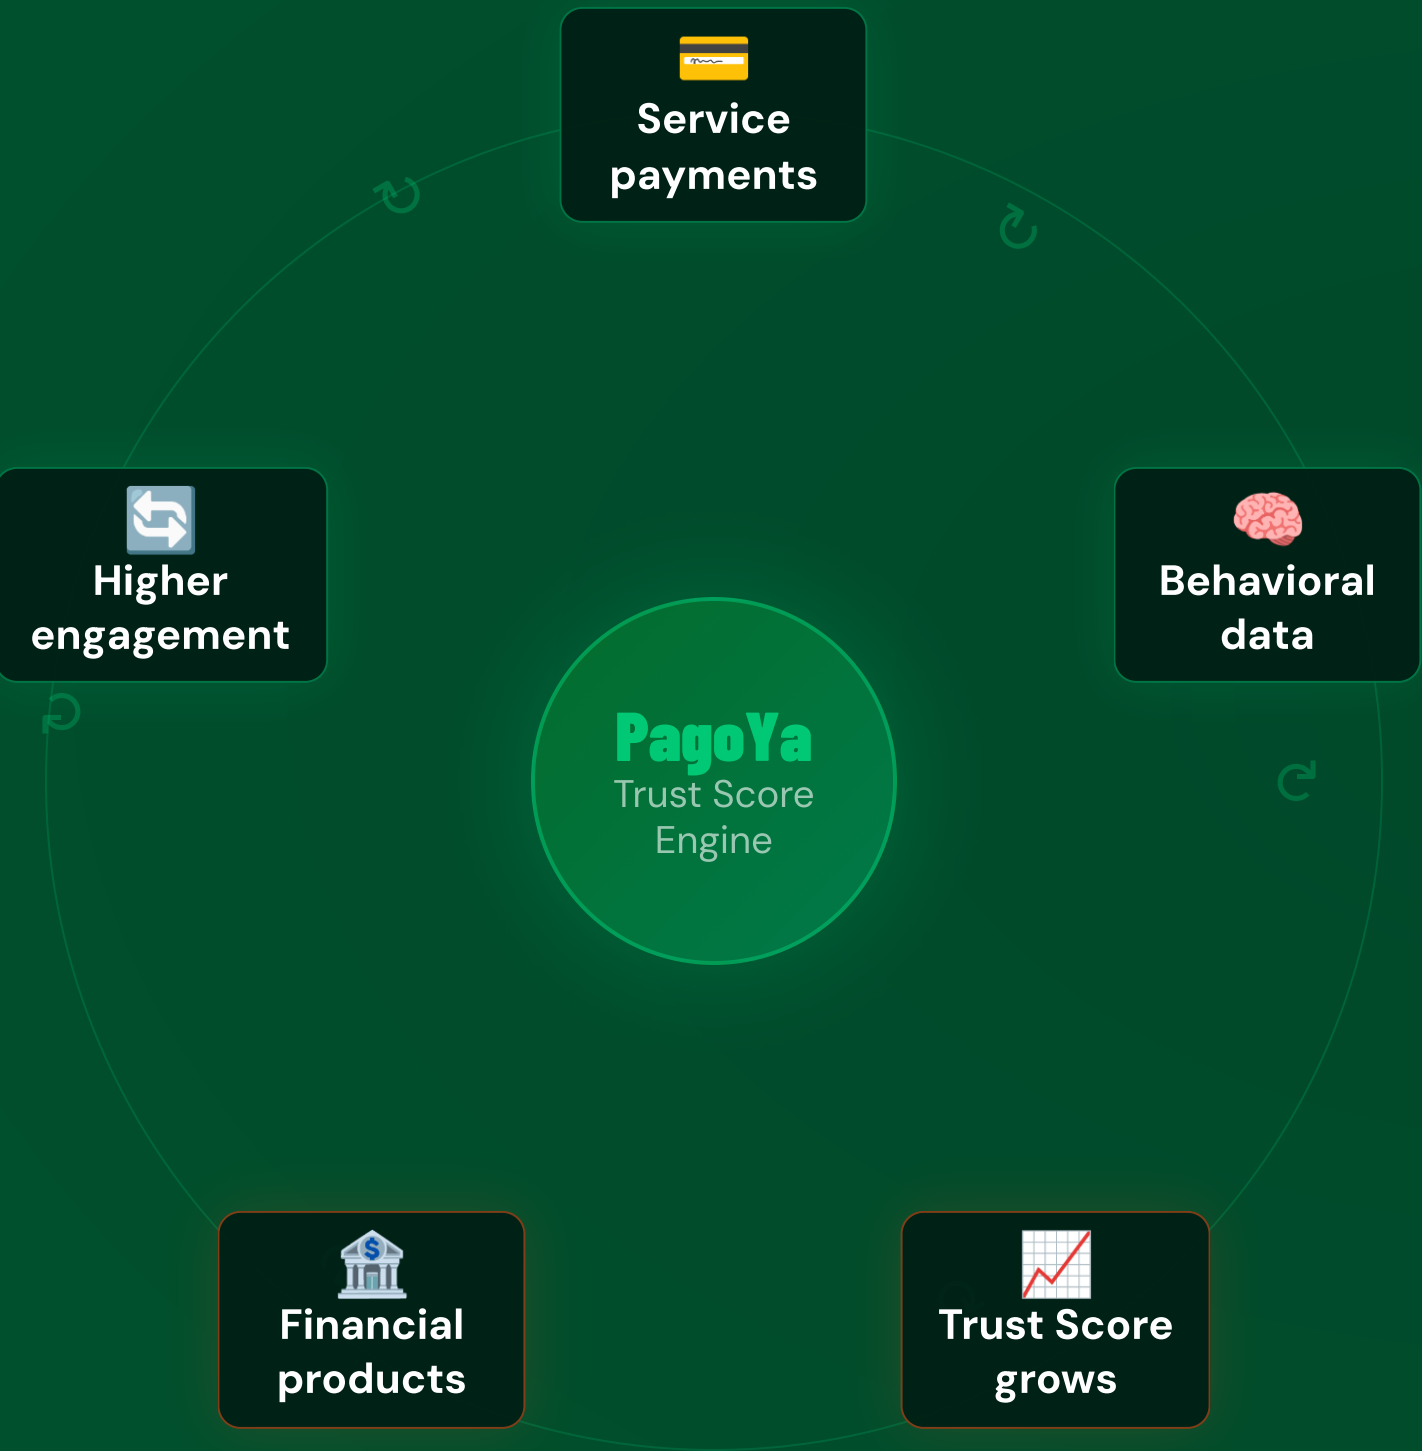

Portable history — US, Canada
Exportable financial identity for the diaspora

→ SOON

65 million people credit bureaus have never seen.
PagoYa is the first company that can prove their creditworthiness.

THE COMPOUNDING EFFECT

A flywheel that accelerates itself.

🎮 LOYALTY & GAMIFICATION LAYER

Welcome spin

Free spin on sign-up — rewards from day 1

Progressive missions

8 active missions: Power Payer, Consistent Month, Multi-Service

Weekly bonus

+15/+30/+50 pts on payments
#3, #5, #10 of the week

Monthly grand prize

\$2,000 MXN raffle — every user is a participant

SWITCHING COSTS — WHY THEY STAY

90 days

Trust Score built — abandoning it means starting from zero

Accumulated points

Redeemable for discounts — lost on exit

Paula knows me

My bills, due dates, history. No competitor has this.

THE RESULT AFTER 12 MONTHS

< \$0

Net effective CAC

Rep activates 1 user ·
P2P activates 3–5 more

85%+

90-day retention

Trust Score creates natural lock-in

5×

Transactions/month

Target frequency per active wallet

THE SOLUTION

One wallet. Every bill. Every gift card. From your phone.

01 Load once at OXXO, by card, or bank debit

22,000 OXXO locations · Stripe card · Belvo bank debit — credited in real time

02 Pay any utility from your phone

CFE, Telmex, Izzi, TotalPlay, Gas Natural, Telcel, Sky, Megacable, Dish, AT&T

03 Buy gift cards and pay subscriptions

Netflix, Amazon, Google Play, Spotify — pay monthly or send as a gift. First Netflix purchase June 2026

04 Confirmed via WhatsApp · Paula

Instant receipt, permanent record, due-date reminders — no app download

\$25

MXN flat fee

Any service. Any amount. Bills or gift cards.

Profitable from \$25 at launch — no loss-leader pricing.

WHAT'S LIVE RIGHT NOW

We didn't pitch it. We built it.

Stripe card payments

Live since May 31, 2026

SIPREL payment network

10+ providers — CFE, Telmex, Sky, Izzi, Telcel...

Conekta / OXXO cash-in

22,000 active deposit locations nationwide

Belvo open banking

Direct bank debit and account linking

Gift cards: Netflix · Amazon · Google Play · Spotify

First Netflix gift card processed June 2026

STP / SPEI interbank transfer

Corporate docs submitted, credentials requested

Beta users registered · Field team active in Puerto Vallarta neighborhoods · Indexed in Google Search Console

MARKET SIZE

Three massive markets. One wallet to serve them all.

65M

unbanked adults in Mexico

22K

OXXO locations processing cash payments daily

\$1B+

MXN in annual payment fee revenue

\$4.2B

MXN Mexican digital gift card market 2025

Utility Payments (SAM) \$180B MXN annual market

Digital Gift Cards \$4.2B MXN · fastest growth

P2P Transfers (next) \$42B MXN informal transfers

Flat \$25 MXN fee per transaction. Base 2× · Target 5× per wallet.

PER TRANSACTION \$25 MXN flat Bills or gift cards. Direct rails — profitable from transaction 1.	ACTIVE WALLETS	2× / MO	5× / MO	USD EQUIV.
	2,500	\$150K MXN	\$375K MXN	—
	25,000	\$1.5M MXN	\$3.75M MXN	—
	250,000	\$15M MXN	\$37.5M MXN	~\$880K–\$2.2M USD
	1,000,000	\$600M MXN	\$1.5B MXN	~\$35M–\$88M USD

Direct rails (SIPREL, Conekta, Stripe) eliminate intermediary margins — profitable at \$25 MXN from transaction 1.

2-4%

Origination fee on micro-loans and BNPL enabled by Trust Score

3 2028+ · PLATFORM

API SaaS

Trust Score API for banks · insurers · remittances · US/Canada diaspora

Field team. Referral network. Multiplier effect.

- | The rep visits taquerías, markets, family businesses — opens pagoyamx.com, registers the user, first payment on the spot
- | The rep earns passive commission on every recurring payment forever → network income, zero upfront CAC
- | Users refer users via WhatsApp link → referral bonus credited to wallet → new activation
- | Each new user grows the rep's passive income + expands activation into their neighborhood network

THREE-LAYER MODEL

01 Direct activation

1 rep → 20–30 users in 30 days, in person, in neighborhoods

02 Passive commission

Rep earns % on every recurring transaction — compounding monthly income

03 Referral cycle

Every user's WhatsApp link is a product demo to their entire contact list

Launch: Puerto Vallarta · Next:
Guadalajara, greater CDMX

P2P: NEXT PHASE

Payments become social infrastructure.

P2P transfers are already built in the backend. The next phase lets users split expenses, send balance, and pay each other directly in WhatsApp.

"Pay your half of the CFE" — one message turns a payment into a social transaction that reaches a new user.

THE NETWORK EFFECT

Every payment = product demo

The recipient sees the WhatsApp confirmation and asks how to sign up. The viral cycle requires zero ad spend.

Users become distribution nodes

Every P2P send is organic acquisition. More users paying each other = exponential referral surface.

CAC approaches zero

Rep activates 1 user → that user's P2P activity activates 3–5 more. Zero paid marketing.

Backend already built

The wallet-to-wallet architecture is implemented in the API. Activation is a product decision, not a technical one.

Every payment builds a credit profile that **65M people have never had.**

WHAT WE COLLECT

- Payment consistency
- Bill cadence and mix
- Cash load frequency
- Income signals
- Reliability score
- Multi-provider history

WHO PAYS FOR IT

SOFOM digital lenders

\$28B USD credit market — blocked by lack of data

Microfinance institutions

No behavioral record exists to score neighborhood communities

Insurers

First reliable risk model for informal-sector workers

Neobanks & fintechs

Verified financial identity pre-attached to acquisition

REVENUE STREAMS

Data licensing

Anonymized behavioral datasets sold to lenders, insurers, and fintechs

Embedded credit

Paula underwrites micro-loans using our own payment history

BNPL for utilities

Split the CFE bill in 3 payments — underwritten with the bill data we already have

Credit history API

Verified financial identity sold as a service to partners

Transaction revenue funds growth. Data revenue is the multiplier. **Mexico's \$28B USD credit market cannot reach the unbanked — not for lack of demand, but lack of data.** PagoYa is the only platform generating that data at scale, legitimately, one payment at a time.

INFRASTRUCTURE

5 live rails. No middlemen.

Most competitors route through 2–3 intermediary layers, paying a margin at every step.

PagoYa no.

Stripe Card payments (Visa, Mastercard)

Live since May 31, 2026

SIPREL Bill payment network — 10+ providers

CFE, Telmex, Sky, Izzi, TotalPlay, Gas Natural, Telcel, AT&T, Megacable, Dish

Belvo Open banking / direct bank debit

Deprioritized Jun 2026 — STP/SPEI covers the direct rail

Why existing options fail our user

	OXXO Pay	Mercado Pago	Spin by OXXO	PagoYa
Flat fee	Per service	Variable	Variable	\$25 MXN
No app download	N/A	Required	Required	Not required
Gift cards	No	Limited	No	Yes — live
Field activation	No	No	No	Yes
WhatsApp AI agent	No	Bot only	No	Yes — Paula
Trust Score / financial identity	No	No	No	✓ Unique

PagoYa is the only wallet built for **cash-preferring users** — and the only one that converts those payments into **portable financial identity**. No competitor can copy that last row in 18 months.

WHY ACCIÓN VENTURES

The right partner builds the right network.

Acción Ventures' portfolio — Clip, Konfío, Destacame — has navigated CNBV licensing, SPEI rails, and financial inclusion at scale across LATAM. We're not just looking for capital. We're looking for this partner because those operators and that network are the fastest path to 100K wallets.

"We need fintech expertise + LATAM distribution network + investor access from a firm that has already funded financial inclusion in Mexico."

WHAT WE'RE LOOKING FOR FROM ACCIÓN VENTURES

01 Regulatory navigation

CNBV SOFOM license as volume scales ·
Banxico SPEI reporting thresholds ·
CONDUSEF compliance

02 Rep network scaling guidance

From 2 reps in Puerto Vallarta to 50+ across 5 Mexican cities — we need operators who have done this before

03 LATAM investor access

LATAM fintech investors who understand \$25 MXN unit economics — not US SaaS investors who'll misread the numbers
