

TECHSTARS — PRE-SEED APPLICATION · JUNE 2026

Pay any bill. Buy any gift card. In Mexico.

Two minutes. \$25 MXN flat. No bank account required.

The AI financial agent built for Mexico's 65 million unbanked adults.

pagoyamx.com • lloyd@pagoyamx.com • Founder Institute Austin · Summer 2026

THE PROBLEM

65 million unbanked adults pay bills at convenience stores.

\$14–20 MXN per service, per trip, every month — standing in line, cash only, no digital record.

| **\$60–80 MXN/month**

in fees for a typical household (CFE + Telmex + 2 top-ups)

| **\$400–600 MXN**

CFE reconnection fee if you miss the due date

| **20–35 minutes**

per convenience store visit including travel and wait time

| **Zero digital record**

no payment history, no credit trail, no receipts — financially invisible

MEET PAULA

 LLM-POWERED AGENT

Not a chatbot. An agent that acts.

Understands natural language

No menus, no forms, no app. Say "Pay my CFE" or "Get me Netflix" — Paula figures out the rest

Reasons and acts autonomously

Looks up the bill, checks your balance, confirms the amount, executes the payment — one message

Persistent memory across sessions

Remembers every bill, due date, and payment. Builds a financial identity for people with no bank account

Proactive — alerts before cutoffs

Paula messages you 3 days before your bill is due. You don't have to remember. She does.

Paula · PagoYa
en línea

✦ Paula proactively alerts you

⚠ Heads up — your CFE bill (\$380 MXN) is due in 3 days.

Should I pay it now from your balance? You have \$520 MXN available.

Yes, pay it

✦ Paula reasons, verifies, executes

Checking your balance... ✓
Verifying CFE account... ✓
Processing via SIPREL... ✓

✅ Done. CFE paid.

📄 Receipt #CFE-2026-0604-8821 · \$380 MXN + \$25 fee

MARKET SIZE

Three massive markets. One wallet to serve them all.

\$25 MXN flat fee per transaction. 2× base · 5× target per wallet.

PER TRANSACTION \$25 MXN flat Bills or gift cards. Direct rails — profitable from transaction 1.	ACTIVE WALLETS	2× / MONTH	5× / MONTH	USD RANGE
	1,000	\$60K MXN	\$150K MXN	—
	10,000	\$600K MXN	\$1.5M MXN	—
	100,000	\$6M MXN	\$15M MXN	~\$350K–\$880K USD
	1,000,000	\$600M MXN	\$1.5B MXN	~\$35M–\$88M USD

Unit economics: direct rails (SIPREL, Conekta, Stripe, Belvo) remove aggregator markups — **profitable at \$25 MXN from launch**, not a loss-leader.

Street team. Referral network. Compounding flywheel.

- | Rep walks into taquerías, tianguis, family businesses — opens pagoyamx.com, registers, first payment on the spot
- | Rep earns passive commission on every repeat payment forever → MLM-style income, zero upfront CAC
- | Users refer users via WhatsApp share link → referral bonus credited to wallet → new activation

THREE-LAYER MODEL

01 Direct activation

1 rep → 20–30 users in 30 days, in-person, in colonias

02 Passive commission

Rep earns % on every repeat transaction — compounding monthly income

03 User referral loop

Each user's WhatsApp share is a product demo to their contact list

Beachhead: Puerto Vallarta · Next:
Guadalajara, CDMX periphery

P2P: NEXT ITERATION

Payments become social infrastructure.

P2P transfers are already scoped in the backend. The next iteration lets users split bills, send balances, and pay each other directly inside WhatsApp.

"Pay your half of the CFE" — one message turns a bill payment into a social transaction that reaches a new user.

THE NETWORK EFFECT

Every payment = product demo

The recipient sees the WhatsApp confirmation and asks how to sign up. Viral loop requires zero ad spend.

Users become distribution nodes

Each P2P send is organic acquisition. More users paying each other = exponential referral surface.

CAC approaches zero

Rep activates 1 user → that user's P2P activity activates 3–5 more. No paid marketing required.

Backend already scoped

P2P wallet-to-wallet architecture is implemented in the API. Activation is a product decision, not a technical one.

THE DATA MOAT

AI builds financial identity for the invisible.

Every transaction Paula processes builds a structured financial profile on someone with no bank account and no credit file.

"We are not just processing payments — we are creating financial identity for 65 million invisible people."

DATA WE COLLECT PER USER

- Payment history
- Income signals
- Cash load patterns
- Bill cadence
- Service mix
- Payment reliability score

WHAT IT UNLOCKS (FUTURE PRODUCTS)

■ Rent reporting & credit building

First credit file for users excluded from BURÓ de Crédito

■ Microloan underwriting

Behavioral data replaces the credit score no one here has

■ BNPL for utilities

Split your CFE into 3 payments — underwritten by our own data

INFRASTRUCTURE

5 rails live. No intermediaries.

Most competitors route through 2–3 intermediary layers, paying a markup at each step.

PagoYa does not.

Stripe Card payments (Visa, Mastercard)

COMPETITIVE LANDSCAPE

Why existing options fail our user

	OXXO Pay	Mercado Pago	Spin by OXXO	PagoYa
Flat fee	Per service	Variable	Variable	\$25 MXN
No app download	N/A	Required	Required	None needed
Gift cards	No	Limited	No	Yes — live
Street activation	No	No	No	Yes
WhatsApp AI agent	No	Bot only	No	Yes — Paula

PagoYa is the only wallet built specifically for **cash-first, smartphone-hesitant users** — activated in person, operated via WhatsApp AI, priced at a single flat fee.

WHY TECHSTARS

The mistakes we're about to make have already been solved.

Techstars alumni — Clip, Kueski — solved CNBV licensing, SPEI rails, and city-by-city scaling in Mexico. We are not applying for validation. We are applying because those operators are in your network.

"We need the fintech mentorship + LATAM distribution network + Demo Day access to investors who understand Mexican unit economics — not US SaaS metrics."

WHAT WE WANT FROM TECHSTARS

01 Regulatory navigation

CNBV SOFOM licensing as wallet volume scales · Banxico SPEI reporting thresholds · CONDUSEF compliance

02 Rep network scaling playbook

From 2 reps in Puerto Vallarta to 50+ reps across 5 Mexican cities — we need operators who've done this

03 Demo Day access

LATAM fintech investors who understand \$25 MXN flat-fee unit economics — not US SaaS investors who will misread the numbers
